

Cumulus® Java Classes 8.5

- Overview
- Requirements
- Installation

Overview

Canto® Cumulus Java Classes enables you to build Embedded Java Plug-Ins (EJAs) for the Cumulus native application as well as Java applets, applications, and JSP pages that can interact with a Cumulus Server. It provides classes that can be used to access any Cumulus catalog in your network just like the Cumulus Client does.

Cumulus Java Classes is provided in two different forms:

- Cumulus Java Runtime
- Cumulus Java SDK

Cumulus Java Runtime as a runtime version is included in Cumulus products such as Web Client and Sites, and may be included in third party solutions. Cumulus Java SDK as a Software Developer Kit is for developers only. It provides sample code and reference documentation.

Cumulus Java Classes 8.5 is designed for Cumulus Workgroup, Enterprise and Cumulus Options version 8.5. It supports Cumulus 8.5 features and cannot be used with any Cumulus Server or Options version prior to 8.5.

Requirements

Cumulus Java Classes 8.5 requires Cumulus Server 8.5 and has the same system requirements:

- Windows 7, Windows Vista™ (and latest patches), Windows XP (SP2 and latest patches), Windows Server™ 2003 (SP1 and latest patches), or Windows Server™ 2008 (and latest patches) – all including Microsoft Windows Installer 3.1
- Mac OS X version 10.5/10.6 (latest patches) or Mac OS X Server version 10.5/10.6 (latest patches)
- Oracle Solaris 9 (or later) for SPARC processors
- Linux x86 (libc version 6, kernel version 2.6.27.7 or higher, libstdc++ version 6)
Tested on: openSUSE 11.1
- Java SE 6 JDK or higher

Installation

Cumulus Java Classes provides two installers:

- Cumulus Java Runtime Installer
- Cumulus Java SDK Installer

The Cumulus Java Runtime Installer can be used as a full installer for a new installation as well as an update installer for existing Cumulus Java Classes 8.x and 7.x installations. Do NOT use the Cumulus Java Classes 8.5 for updating any Cumulus Web application.

Uncompress the file you downloaded from the Web.

To start the Cumulus Java Runtime Installer:

- Windows: Double-click **Install Cumulus Java Runtime.exe**
Mac OS X: Double-click **Install Cumulus Java Runtime**
Solaris, Linux: Enter **sh CJR850.bin**
- Follow the on-screen instructions.
When updating a third party solution based on Cumulus Java Classes Runtime, please contact the provider of this solution for information on the installation folder to be chosen.

To start the Cumulus Java SDK Installer:

- Windows: Double-click **Install Cumulus Java SDK.exe**
Mac OS X: Double-click **Install Cumulus Java SDK**
Solaris, Linux: Enter **sh CJSDK850.bin**
- Follow the on-screen instructions.
